

Industrial Automation & Motion Control Products

Industrial shock absorbers, velocity controls, gas springs, rotary dampers

Airstroke® actuators, Airmount® Marshmallow® isolators, air springs, air pickers, and air grippers

Air operated vacuum pumps, venturis, cartridge inserts

Extruded aluminum strut for machine guards and bases

Terminal blocks, circuit protection devices, strain reliefs, power supplies, foot switches, safety relays, pin & sleeve devices

Automation control products including: sensors, PLC's, power supplies, HMI's drives, and servos

Hydraulic valves, proportional controls, pumps, cylinders, and systems

Light curtains, mats, scanners, safety interlocks, safety relays, non-contact safety switches, and safety network controllers

Nickel-plated brass push-on tube fittings, pneumatic components

Machine status indicators, warning lights, light towers

Hydraulic vane pumps, piston pumps, valves, controls, proportional valves, power units, and systems

Hydraulic and pneumatic NFPA type cylinders, custom cylinders

Multi-axis electro hydraulic, electric servo, and stepper motion control products

Pneumatic and electric automation and motion control products

Automation components, grippers, slides, rotary actuators, compliance devices, tool changers, industrial clamping & work holding devices, cam indexers, and conveyors

Motor starters, contactors, overloads, terminal blocks, DIN rail mounted circuit breakers, push buttons, pilot devices, solid state relays, soft starters

Tube fittings, hydraulic/air hose, fittings, plastic tubing, JIC fittings, hose crimping systems, quick-disconnect couplings

Clamps, hydraulic filters, valves, test points, and other hydraulic accessories

Electric linear actuators featuring rugged construction, long life, and high precision

PCB connectors, terminal blocks, junction boxes, remote I/O products for decentralized automation

Instrumentation & Process Control Products

Pressure gauges, switches, and transducers

Process controllers, temperature controllers, PLC's, HMI's, and sensors

Control valves, solenoid valves, and regulators for industrial instrumentation, OEM, and aerospace/military market

Miniature 2 and 3-way solenoid valves for the control of liquids and gases. Heavy-duty actuated process valves for both low and high pressure

Actuated valve assemblies and manual ball valves

Miniature solenoid valves, custom valves and manifolds in stainless steel, brass, and plastic

Dry vacuum pumps, liquid ring vacuum pumps, vacuum systems, blowers, compressors

Plastic valves in a variety of materials including Geon® PVC, Corzan® CPVC, Kynar® PVDF, PTFE, Glass-Filled Polypro, and Natural, unpigmented Polypropylene

Pressure regulators, diaphragm valves & filters for the analytical, instrumentation, petrochemical, oil, gas, & specialty gas industries

Compressed air dryers and FRL's

Ultra high purity orbital weld fittings, face seal (VCR) fittings, ultra clean valves, modular gas stick components, instrumentation valves and fittings

Process solenoid valves, high purity valves, media isolation valves, flow sensors, pressure sensors, process pumps

Instrumentation valves, fittings, and filters in stainless, brass, and other materials

Quick connect couplings in a variety of materials, sizes, and configurations. Custom couplings as well

Flow sensors and devices for measuring and controlling fluids and gases

Air valves, process valves, NAMUR style valves in brass and 316 stainless steel
